Ford Escort RS Turbo

Needs full restoration

1987

A total of 8,604 were built due to increased demand, almost all in Diamond White. Produced in both LHD and RHD, it was only marketed in a few European nations with 5,000 examples for the UK, and was only sold through official Rallye Sport dealers.

They were well equipped, with the alloy wheels from the limited production RS 1600i, Recaro seats, and a viscous-coupling limited slip differential. Only three cars were finished in black; one of them built especially for Lady Diana.

The Series 2 RS Turbo continued with the 1986 MKIV model
