Ford Sierra 2.0i

The 1990 Ford Sierra Sapphire 2.0L Petrol is a refined version of the classic Sierra, characterized by its sedan body style (often referred to as the "Sapphire" in the UK). The 2.0-liter inline-four engine delivers around 130 horsepower, providing a good balance of performance and efficiency for everyday driving.

This model features a front-wheel-drive layout and typically comes with either a five-speed manual or a four-speed automatic transmission. The Sapphire trim offered a more upscale interior compared to earlier models, with improved comfort and additional features like power windows, central locking, and upgraded upholstery.

The 1990 Sierra Sapphire is known for its practicality, spacious cabin, and solid handling, making it a popular choice among families and commuters during its time. It represents the later years of the Sierra lineup before Ford transitioned to newer models.
